COMMENCEMENT OF ADDITIONAL PILE DRIVING

Commencing late August the DBCT 7X Project intends to undertake a trial period of pile driving on Sundays. The trial period will be for one month and will only apply to the jetty widening. Subject to the success of the trial, Sunday piling may continue until the end of the year.

Noise emissions to date have been monitored and reviewed. With the jetty widening construction activities now over 1.7km offshore no significant noise from piling activities is expected at local residences. Noise emission monitoring will continue.

Only one pile will be driven on any one Sunday and piling will only commence between the hours of 9 a.m. and 3 p.m. Each pile will be driven within one to two hours.

For further enquiries or information contact Simon Foster - 0438 199 908
